# Chapter 1

## Introduction

### 1.1 Introduction

Originally, C language is developed from two previous languages, BCPL and B. BCPL which were developed in 1967 by Martin Richards as a language for writing operating systems and compilers. C was evolved from B by Dennis Ritchie at Bell Laboratories and it was implemented in 1972. It initially became widely known as the development language of the UNIX operating system. Lots of today's leading operating systems are written in C and C++. C language is mostly hardware independent as it is possible to write C programs that are portable to most computers.

Why we use C language C has been used successfully for each kind of programming problem thinkable from operating systems to spreadsheets to expert systems - and efficient compilers are accessible for machines ranging in power from the Apple Macintosh to the Cray supercomputers. The largest measure of C's success appears to be based on strictly sensible considerations:

1. The standard library concept;
2. the ease with that applications can be optimized by hand-coding isolated procedures;
3. a powerful and varied repertoire of operators;
4. the portability of the compiler;

### 1.2 Design Goals/Objective

- A bank management system would be able to maintain information and to keep to records of that particular event.
- The objective of this project is to make a system like a bank app.
- The program allows the user to create new account, to do cash deposit and withdrawal, show account information respectively.

# Chapter 2

## Implementation of the Project

### 1. Flow Charts

When the program is started, the user will direct to the main menu. The user will be required to select one of the four options.

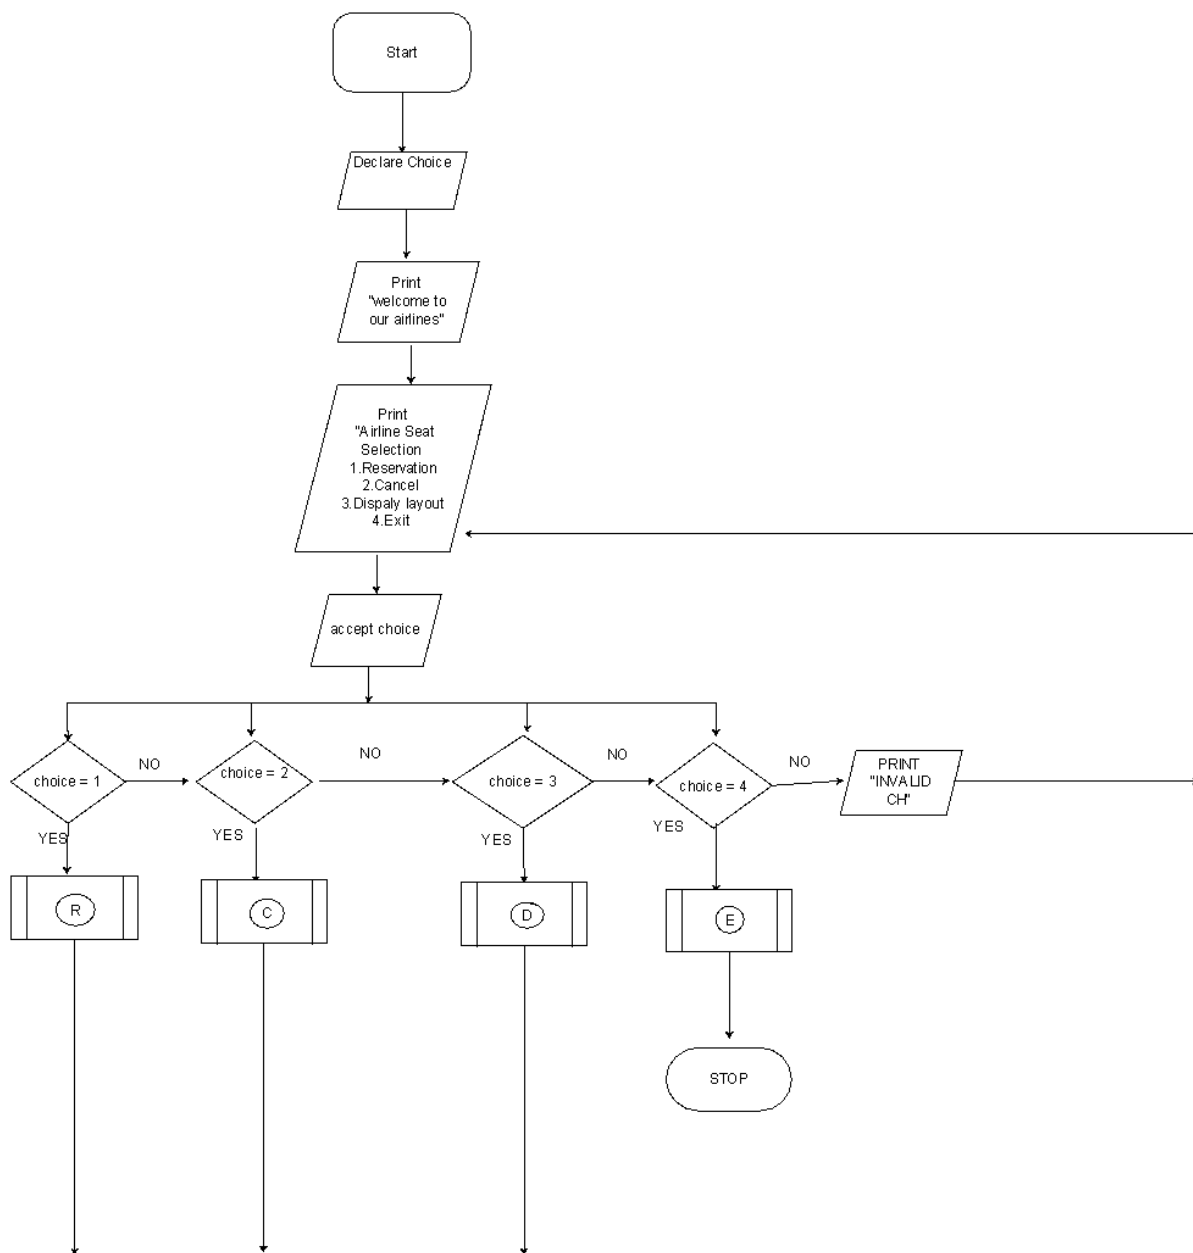

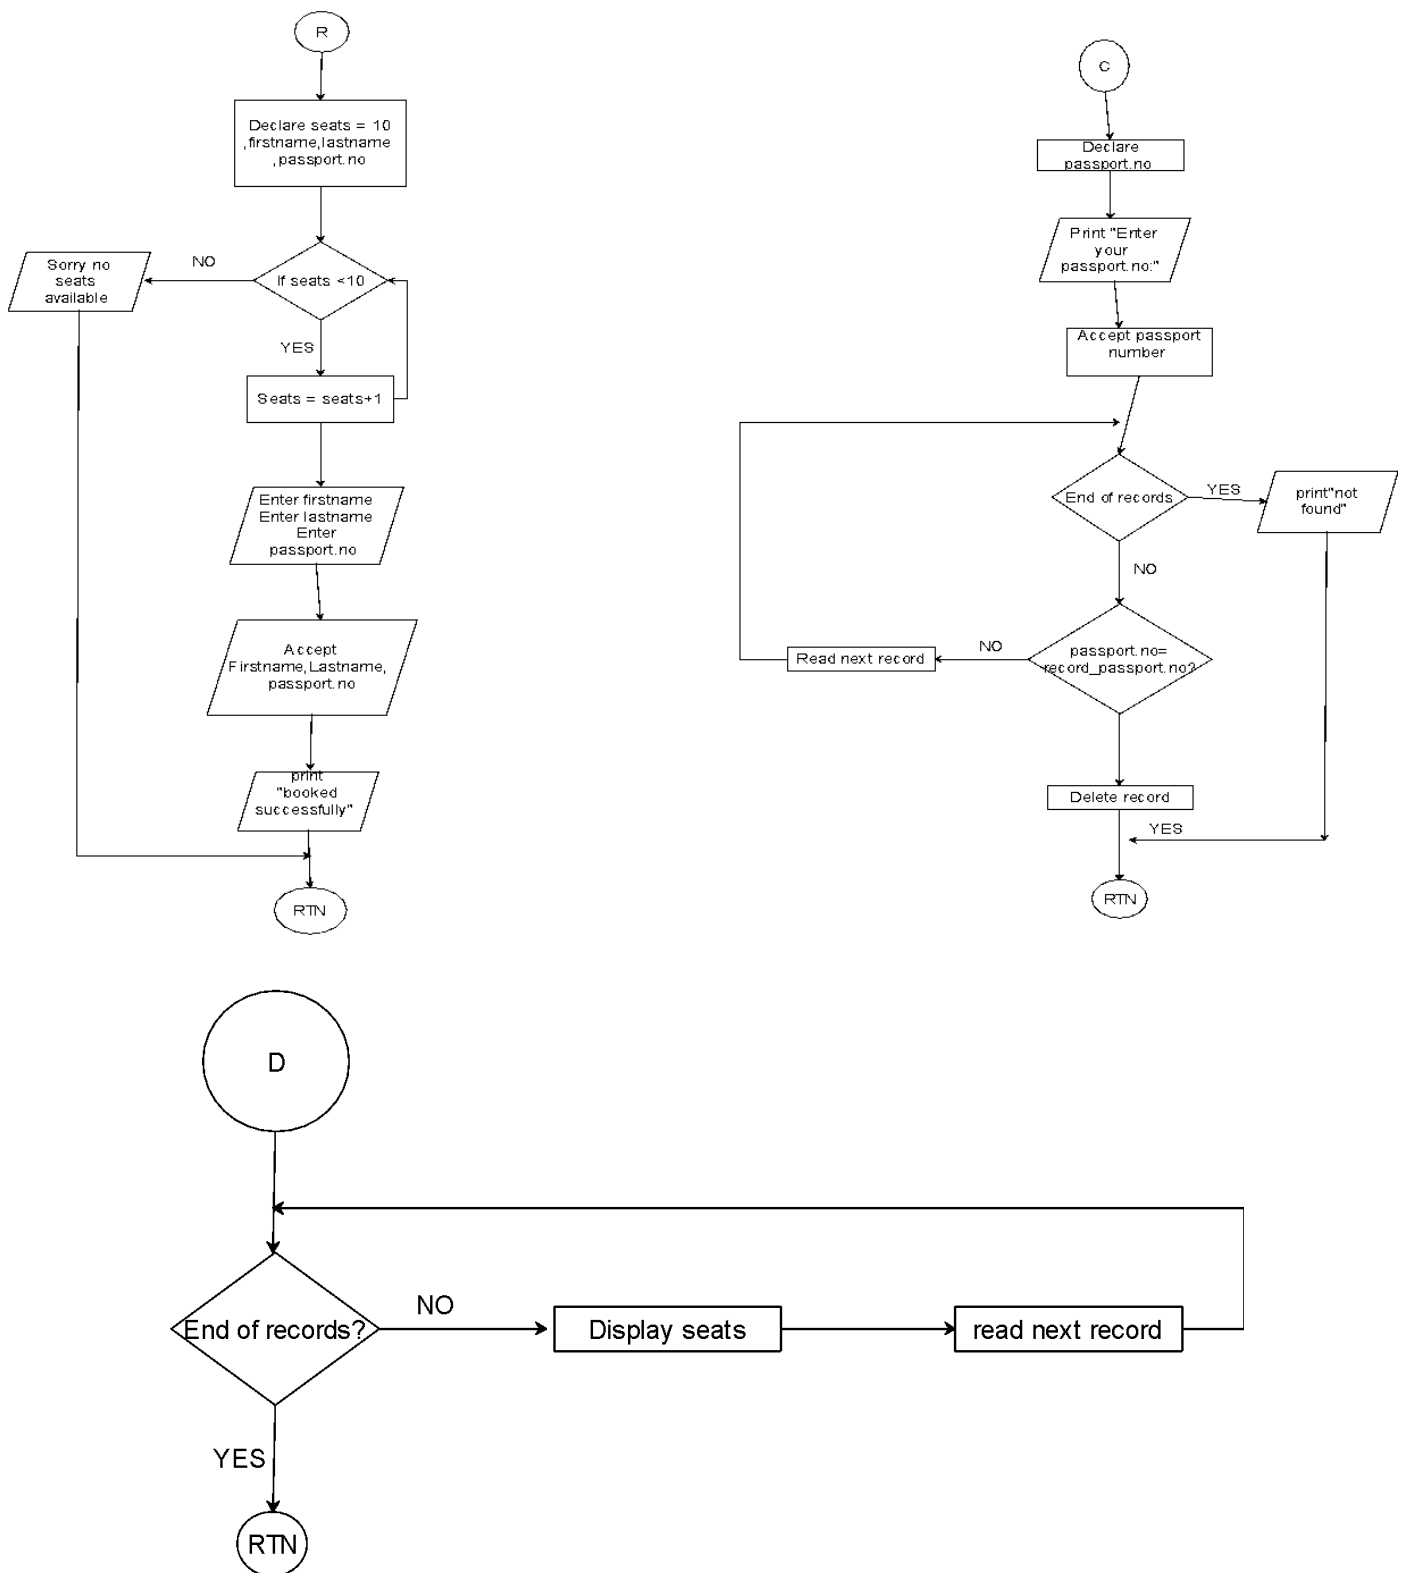

Figure1: Flow Chart of Main Menu

**Figure 2: Flow Chart of different Activities involved in different functions of the project**

## 2. Implementation

### C source code

```
#include<stdio.h>

## Screenshots

*Figure 1 & 2: Main Menu interface*

When the program is executed, the user will be directed to the main menu interface. The program is introduced with a few lines of texts. Then four selections are made for the user as the user can choose to reserve, cancel, display or exit the program.

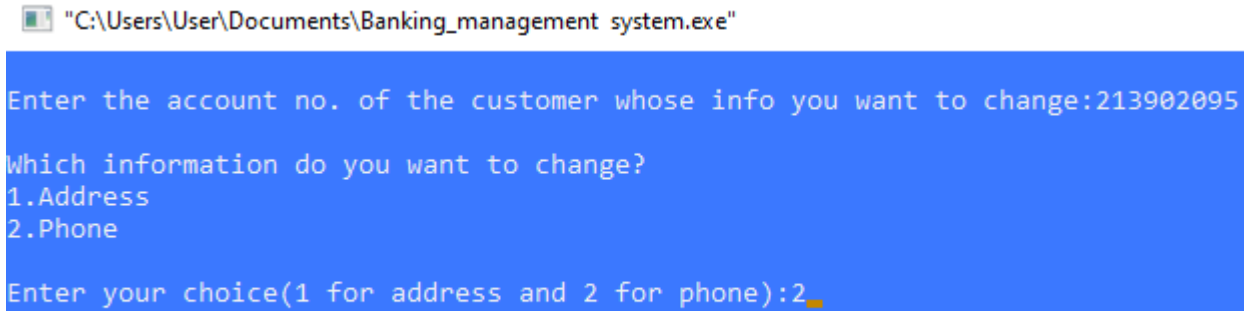

*Figure 3: Invalid value entered (main menu)*

. If the user accidentally enters an invalid input, an interface will be shown to notify the user to choose again and it notify the user again to enter from 1-4.

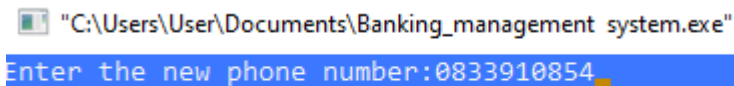

*Figure 4: Open new account*

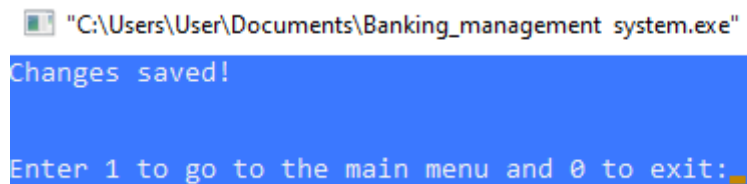

The program is asking the user to enter passport number, name, and the email address to reserve a seat for the user and the seat cannot be book for anyone else.

```
"C:\Users\User\Documents\Banking_management system.exe"
Enter the account no. of the customer whose info you want to change:213902095
Which information do you want to change?
1.Address
2.Phone
Enter your choice(1 for address and 2 for phone):2
```

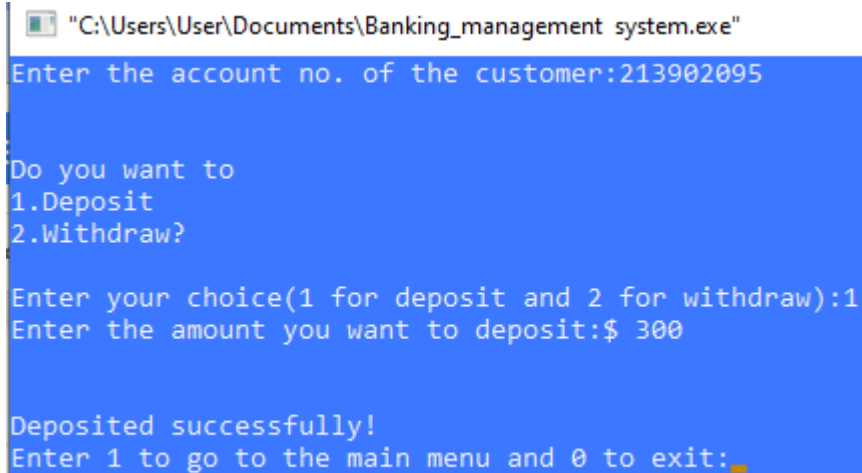

```
"C:\Users\User\Documents\Banking_management system.exe"
Enter the new phone number:0833910854
```

```
"C:\Users\User\Documents\Banking_management system.exe"
Changes saved!
Enter 1 to go to the main menu and 0 to exit:
```

*Figure 5 , 6 & 7: Account updated*

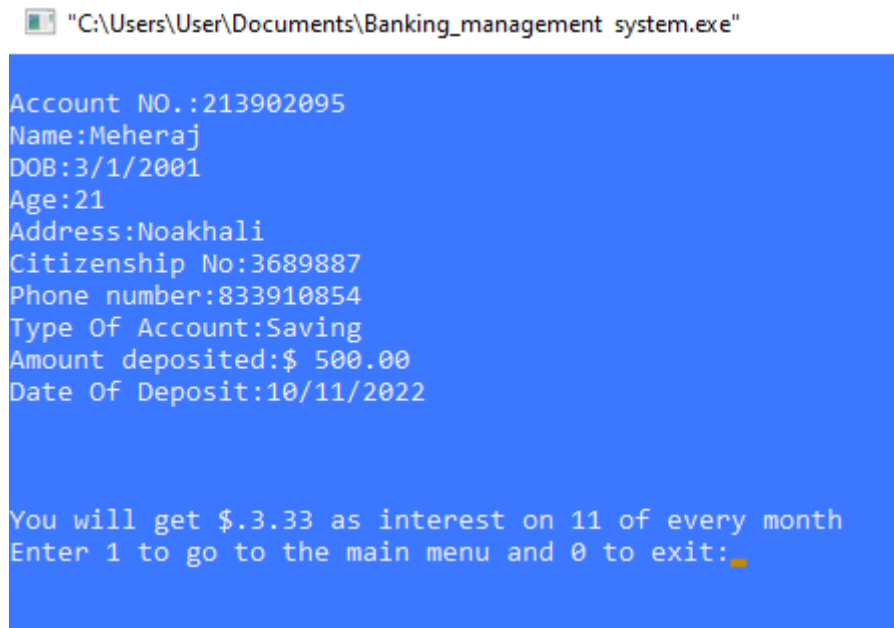

As shown in the interface the seat reservation has been booked successfully, after the user has entered the details.

```
"C:\Users\User\Documents\Banking_management system.exe"
Enter the account no. of the customer:213902095
Do you want to
1.Deposit
2.Withdraw?
Enter your choice(1 for deposit and 2 for withdraw):1
Enter the amount you want to deposit:$ 300
Deposited successfully!
Enter 1 to go to the main menu and 0 to exit:
```

*Figure 8: Transaction*

After registering 15 users in the system now the flight supposed to be full and cannot except anymore.

```
"C:\Users\User\Documents\Banking_management system.exe"

Account NO.:213902095
Name:Meheraj
DOB:3/1/2001
Age:21
Address:Noakhali
Citizenship No:3689887
Phone number:833910854
Type Of Account:Saving
Amount deposited:$ 500.00
Date Of Deposit:10/11/2022

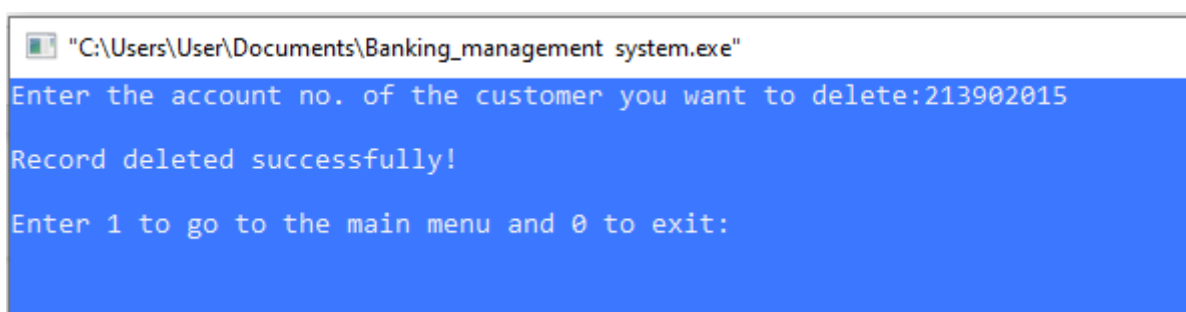

You will get $.3.33 as interest on 11 of every month
Enter 1 to go to the main menu and 0 to exit: 
```

*Figure 9: Check the account details*

The system will pop out to notify the user that there's no seat available, the flight contains only 15 seat after that it is displaying it is full sorry we cannot register anymore.

*Figure 9: cancel function*

After the passenger entered 3 and want to cancel the record, after that, the program requires the user to enter which passport number to delete it. For example, that mufti registered the seat in the flight and he wants to cancel it.

```
"C:\Users\User\Documents\Banking_management system.exe"

Enter the account no. of the customer you want to delete:213902015

Record deleted successfully!

Enter 1 to go to the main menu and 0 to exit: 
```

*Figure 10: Remove account*

The system asking mufti to enter his passport number to cancel it from the system without any problems and in efficient way. After mufti entered his passport number the system pop in your record has been deleted from the system.

```
"C:\Users\User\Documents\Banking_management system.exe"

ACC. NO.      NAME      ADDRESS      PHONE
213902035    Farhan    Barishal    1289563421
213902095    Meheraj   Noakhali    833910854
213902015    Irteza    Barishal    1835346587

Enter 1 to go to the main menu and 0 to exit: 0
```

Figure 11: View Customer list

If mufti entered the wrong passport number by mistake the system pop in hey ahmed passport number is wrong, please check your passport number and enter it again.

```
"C:\Users\User\Documents\Banking_management system.exe"

=====Welcome to ATM Feature=====

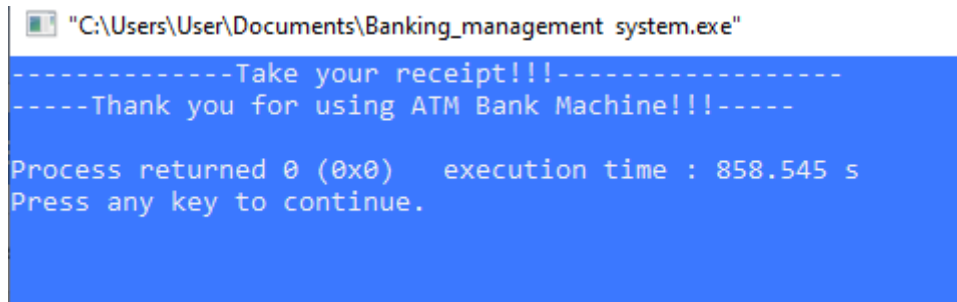

----Please choose one of the options below----

< 1 > Check Balance
< 2 > Deposit
< 3 > Withdraw
< 4 > Exit

-----
Your Selection:
```

Figure 12: Atm Feature

The interface is displaying all the users record that now you have two seats ahmed with his details and mufti with his details as well. There's line between the users to make it clear to read and do not misunderstand it.

```
"C:\Users\User\Documents\Banking_management system.exe"
-----Take your receipt!!!-----
-----Thank you for using ATM Bank Machine!!!-----
Process returned 0 (0x0)   execution time : 858.545 s
Press any key to continue.
```

Figure 13: For receipt

# Chapter 3

## Conclusion

### Learning Outcome

This program will provide the transaction happening inside the process automatically. All information will be updated by using the information stored in the system and after performing all the tasks the program will end.
